

Undercarriage Components from Hardings

With decades of field and service experience on undercarriage applications we know the importance of providing customers with high quality components that perform up to expectations in tough conditions. Hardings distributes undercarriage products from the world's best respected manufacturers including ITR.

ITR manufactures an extensive range of quality Undercarriage parts for use on Dozers, Excavators, and Crawler Loaders produced by Caterpillar, CNH, Deere, Hitachi, Komatsu, and many other quality manufacturers. Superior Quality, Durability, and Performance provide long life in extreme working conditions.

Idlers

ITR's Cast idlers are manufactured using the latest automated design and manufacturing processes. Produced with the select quality steel alloys, and properly heat treated to provide the exceptional field performance in extreme working environments. These proven Idlers utilize the latest Seal & Bearing designs and provide exceptional reliability. Produced to some of the most stringent specifications in the industry, ITR Idlers give excellent service in the toughest operating conditions.

Rollers

ITR Manufactures a complete range of Premium Quality Track Rollers for Bulldozers, Excavators, and Mini-Excavating Equipment.

ITR Rollers feature differential quenching or through hardening according to the application requirements. Shells are forged from Alloy Steel with Reinforced Flanges. Shafts are forged, machined and polished to provide minimal friction between shaft and bushings for longer life in real world applications with the higher ground speeds used today. To ensure perfect sealing, Seal assemblies are seated using automated forward and reverse rotational equipment, pressure tested and lubricated.

Sprockets & Segments

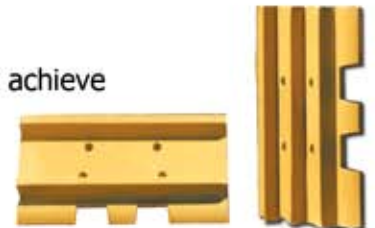

ITR is one of the World's Leading Manufacturer's of Sprocket s & Segments.

Produced with "state of the art" manufacturing technology, ITR segments are forged using the finest Alloy Forging Steels, machined to exacting tolerances and heat treated to provide excellent wear and strength characteristics.

Track Shoes

ITR Track Shoes are produced from high quality alloyed steel and heat treated to achieve the best balance in Hardness and Abrasion Resistance for long life in tough working conditions. Available in a wide range of sizes and styles.
